

Programmatic Process Simulator (Working Model)

Simulates the programmatic process end-to-end — from advertiser brief to delivered impressions and revenue split: GCash owns the data (DMP) and part of the inventory (SSP), Mall Plus runs the buy side (DSP) plus its own marketplace inventory (SSP). Wired to the live rate cards, CTR benchmarks and take-rate math.

🕒 working model — fee/uplift assumptions flagged PROPOSED

DMP = GCash

SSP = GCash + Mall Plus

DSP = Mall Plus

1 The stack — who owns what

flows: advertiser → DSP → SSP → delivery, fueled by DMP

DMP · DATA MANAGEMENT PLATFORM

GCash

- ▶ 94M registered users · 35M fully e-KYC'd
- ▶ KYC demographics (age/gender/location/SEC)
- ▶ Payment platform: banked vs unbanked · wallet vs bank-linked · card · GGives credit
- ▶ Transaction behavior: banked/unbanked, high/low spender, send-money/bills/load activities
- ▶ 50+ interest affinities (nightlifers, pet lovers, beauty junkies...)
- ▶ City-level geo · GGives credit signals

SSP · SUPPLY-SIDE PLATFORM

GCash + Mall Plus

- ▶ **GCash surfaces:** receipt page ₱230 · promo card ₱320 · mobile banner ₱300 · pop up ₱380 (MadTech 2026 real)
- ▶ **Mall Plus surfaces:** Carousel ₱285 · Featured Brands ₱304 · Hot Keywords ₱11.40 CPC · Pop Up ₱361 (A-scenario, MadTech -5%) · Push TBD
- ▶ **Inventory choice:** skew between GCash only and the Mall Plus ad set — GCash-only ⇌ GCash + Mall Plus (drives the revenue split)
- ▶ Reservation mechanics: prepaid · 2-hr payment · guaranteed slots (Pop Up/FB) · 1,000-imp increments
- ▶ Unified rate card = transparent CPM commitment (differentiation vs auctions)

Mall Plus

- ▶ Campaign builder: objective → bidding mode → target level
- ▶ **Ad product mix** — the 4 ad formats (Carousel · Featured Brands · Hot Keywords + Sponsored · Pop Up) with share of impressions & CPM; presets = package tier mixes (Tier 1 Launch → Tier 6 Imperial)
- ▶ **Duration & flight plan** — start/end dates · 14-day calibration freeze · daily pacing (₱/day, imps/day)
- ▶ Targeting UI on DMP segments (broad → interest → transaction → CRM retarget)
- ▶ Budget & ROI dials — ad product mix presets (future Auto/GMV-Max style)
- ▶ Managed tier (JBP 1–3, -5%/-10%) + future self-serve
- ▶ Reporting: impressions fill, blended CPM, CTR, CPC, landing conv, ROAS, gross & net revenue

Advertiser budget

DSP Mall Plus

SSP GCash + Mall Plus inventory

Delivery & attribution

DMP GCash segments feed targeting **both** ways

2 DMP — GCash data products

uplift & fees are PROPOSED assumptions — validate with GCash data team

SEGMENT PRODUCT	DATA USED	CTR UPLIFT VS BROAD	DATA FEE ON MEDIA	BASIS
Broad (no data)	— all GCash users	1.00×	0%	Baseline
Interest affinity	50+ affinities (nightlifers, pet lovers...)	1.30× PROPOSED	+10% PROPOSED	Airship: personalization lifts opens +37%; GCash affinities from transaction signals
Transaction behavior	high spender, banked, category spenders	1.60× PROPOSED	+15% PROPOSED	Purchase-intent audiences outperform affinity (OptimO case studies)
CRM retarget	previous brand/product purchasers (KYC + txn)	2.20× PROPOSED	+20% PROPOSED	OptimO Vaseline: CRM audiences → -40% CPLPV, -2% CPA; Airship segmentation up to +350% purchases

GCash FAQ confirms sellable targeting: demographics, transaction behavior, 50+ affinities, city-level geo (CPM-billed, ₱100K min per placement). Fee schedule is a working assumption — OptimO-style "ready-made audiences" are the premium tier.

3 SSP — the two inventory sides

GCash surfaces = MadTech real rates · Mall Plus = Scenario A · skew = the inventory choice

♥ GCash surfaces

SCENARIO 1 · GCASH ONLY AD PRODUCTS 9,868,421 imps · 2.26% CTR · ROAS 5.94×

MALL PLUS (DSP + MARKETPLACE) — GCASH-ONLY BASIS

₱1,254,644

DSP managed-service fee	₱300,000
Take-rate revenue (5.36% × GMV)	₱954,644
Mall Plus gross	₱1,254,644
COGS — server cost (₱/mo × flight days/30)	₱31,350
Mall Plus net revenue	₱1,223,294
Net margin	97.5%

GCASH (DMP + SSP) — GCASH-ONLY BASIS · ALL MEDIA

₱3,450,000

DMP data fees (segment surcharge)	₱450,000
GCash SSP media (full budget)	₱3,000,000
GCash gross	₱3,450,000

SCENARIO 2 · GCASH + MALL PLUS AD PRODUCTS

Mall Plus set at MadTech -5%: Carousel ₱285 · FB ₱304 · HotKw ₱228 · Pop Up ₱361 (mix-driven) · GCash share = SSP skew (\$3)

MALL PLUS (DSP + OWN SSP) — GROSS & NET REVENUE

₱2,892,341

DSP managed-service fee	₱300,000
Mall Plus SSP media (own surfaces)	₱1,500,000
Take-rate revenue (5.36% × GMV)	₱1,092,341
Mall Plus gross	₱2,892,341
COGS — server cost (₱/mo × flight days/30)	₱31,350
Mall Plus net revenue	₱2,860,991
Net margin	98.9%

GCASH (DMP + SSP) — REVENUE

₱1,950,000

DMP data fees (segment surcharge)	₱450,000
GCash SSP media (own surfaces)	₱1,500,000
GCash gross	₱1,950,000

Scenario 1 (GCash only): blended CPM fixed at $\approx \text{₱}304.00$ (MadTech card mix: Pop Up 25% · Promo 25% · Banner 20% · Receipt 30%) and CTR $\approx 1.41\%$ — all media to GCash; Mall Plus earns DSP fee + take-rate only. Scenario 2 (GCash + Mall Plus): Mall Plus side blends the 4 ad products live from the mix (default Dominate $\approx \text{₱}286.90$ CPM / 1.73% CTR; presets = Tier 1–6 package mixes from the CPM Showcase workbook). The GCash/Mall Plus split follows the SSP skew ($\text{₱}3$) — 0% = GCash only, 100% = Mall Plus only. Data uplift applies to blended CTR; data fee applies to total media.

5 Model guardrails

What's real vs proposed

ITEM	STATUS
Rate cards (A: MadTech -5% · B: MadTech real)	REAL (files)
CTR benchmarks (Q2'23 GCash + mix-weighted)	REAL (files)
Take rate 5.36% net of VAT	REAL (Go-Live model)
Server cost COGS ($\text{\$}550/\text{mo} \approx \text{₱}31,350$)	REAL (G-confirmed · Asset Costing file)
GCash min buy $\text{₱}300\text{K}$ / $\text{₱}100\text{K}$ per placement	REAL (GCash FAQ)
Data-tier CTR uplifts (1.3×–2.2×)	PROPOSED — basis cited
Data fees (+10/+15/+20%) & DSP fee (+10%)	PROPOSED — price with finance/GCash

Operating rules

- Impressions guaranteed (CPM contract) — ROAS delivered, never promised.
- 14-day calibration freeze; changes restart the window.
- DMP data is GCash's moat — Mall Plus (DSP) licenses segments, doesn't own them.
- SSP neutrality: GCash surfaces priced at MadTech card; Mall Plus at -5% — the spread is the JBP discount headroom.
- Revenue shown on 2 bases: Scenario 1 GCash-only (all media at card rates) · Scenario 2 GCash + Mall Plus (inventory-slider split).
- Push Notification (candidate 5th) excluded until GCash quotes the rate.
- Model mirrors OptimO's "ready-made audiences" and TikTok's ROI-dial — automation is the upgrade path, not the launch.
