06 • Takeaways

01 · Landscape — four different apps, one identical ad shape

What each platform is, who advertises on it, and how it prices its inventory (in-app only).

TikTok

Social / entertainment — short-form video, discovery-first

PRIMARY JOB

Demand generation · brand awareness · impulse discovery

WHO ADVERTISES

Brands & agencies via Ads Manager (self-serve)

CORE PRICING

Auction only — CPM / CPC / CPV, no published rate card; min **\$50/day** campaign, \$20/day ad group

PUBLISHED BENCHMARKS

~1–2B MAU · **70%** of surveyed users discovered a new brand on TikTok

Shopee PH

E-commerce marketplace — search + browse, shopper intent

PRIMARY JOB

Demand capture · shopper conversion

WHO ADVERTISES

Sellers & brands via Seller Center (self-serve); brand ads via AMS

CORE PRICING

CPC auction from ₱0.30; GMV Max **tROAS automation** (H1 2026); premium **Homepage Brand Ads on CPM** (reserved dates); campaign packages ₱5.6K–151K

PUBLISHED BENCHMARKS

₱7 sales per ₱1 ad spend · +24% orders · +31% product views

Lazada

E-commerce marketplace — search + browse, shopper intent

PRIMARY JOB

Demand capture · shopper conversion

WHO ADVERTISES

Sellers & brands via Seller Center; brand/retail media via Marketing Solutions KAM

CORE PRICING

tROAS / CPC auction (Sponsored Max) + **CPM rate card** for premium display (1,000-imp increments)

PUBLISHED BENCHMARKS

400K+ brands · **+48% sales uplift** · ROI up to **10×**

Grab

Superapp — transport, food, mart, fin; transaction-first

PRIMARY JOB

Capture daily transaction moments + brand awareness

WHO ADVERTISES

Merchants & brands via Ad Manager (self-serve, ~3-min setup) + managed GrabAds

CORE PRICING

Search/Listing = **CPC keyword auction** (published); feed/transit image + video = **package / CPM** (not published)

PUBLISHED BENCHMARKS

465 cities / 8 countries · 60–80% of users transact on app open · **in-transit 2.5×** engagement

Same two-layer shape on every platform

All four monetize the exact model Mall Plus is building: **(1) auction performance ads on intent** — search & browse (Shopee CPC ₱0.30, Grab keyword auction, TikTok Search, Lazada Sponsored) and **(2) premium CPM brand inventory** on owned, high-attention in-app surfaces (Shopee Homepage Brand Ads, Lazada Sponsored Display, Grab Masthead & in-transit, TikTok TopView).

02 · In-app ad product matrix — 32 products, 4 platforms

Full in-app/on-platform lineup. Self-serve tags: **SELF** = Ad Manager / Seller Center · **SALES** = via sales team / AMS / KAM · **MANAGED** = managed service. Pricing: green = CPC / auction · gold = CPM / premium · indigo = package / mixed.

03 · Pricing & entry barriers — what it costs and what it takes

PH peso conversions at ~₱57/USD (indicative). How each platform charges in-app, and how hard it is to get in.

ASPECT	TIKTOK	SHOPEE PH	LAZADA	GRAB
Performance / self-serve	Auction — bid CPM, CPC or CPV per objective. No public rate card.	Auction CPC from ₱0.30/click (Product / Shop / Discovery / Boost). Pay per click only.	Sponsored Max on target ROI/ROAS ; Sponsored Discovery CPC.	Search & Listing — CPC keyword auction (pay on click; impressions free).
Premium brand inventory	TopView · Branded Takeover · Effects · Challenge · Pulse — premium CPM via managed deals .	Homepage Brand Ads — CPM , reserve dates in advance, guaranteed placement .	Sponsored Display — CPM rate card , 1,000-imp increments, auto-pause, min reservation; Brand Search/Boost via KAM packages.	Masthead + in-feed video + in-transit — package / CPM via GrabAds team; rate card not published.
Minimum budgets	\$50/day campaign (~₱2,850) · \$20/day ad group. Enforced floors.	No public minimum; self-serve from ₱0.30 CPC.	No public minimum for self-serve; premium display has country-specific min reservation (KAM).	No public minimum; premium via managed service.
Self-serve vs managed	Mostly self-serve; premium formats need sales team.	Self-serve in Seller Center; Homepage Brand Ads via AMS.	Self-serve for Max/Discovery; brand & display via KAM.	Ad Manager self-serve (~3-min launch); Masthead & rewards via GrabAds team.
Published benchmarks	70% of surveyed users discovered a new brand on TikTok.	₱7 sales per ₱1 · +24% orders · +31% product views.	+48% sales uplift · ROI up to 10× · 400K+ brands.	60–80% transact on app open · in-transit 2.5× engagement · 465 cities / 8 countries.

Where Mall Plus sits on this map

- **Transparent where others are opaque:** Mall Plus publishes its CPM rate card — costed at **5% below the MadTech card** (₱285–361/product; Hot Keywords ₱11.40 CPC → ₱228 CPM-equiv) — TikTok is auction-only, Grab unpublished. A pitch advantage for budget planners.
- **Fixed pricing in the performance layer:** Mall Plus’ ₱11.40 CPC Hot Keywords sits alongside Shopee’s ₱0.30-start and Grab’s search CPC auctions — but with predictable, card-published pricing.
- **Grab’s keyword auction playbook** (generic / branded / competitor + match types) is the exact blueprint for Hot Keywords + Sponsored Ads.
- **Lazada’s 1,000-imp booking + auto-pause** is the operational benchmark for how Mall Plus should run Pop Up / Featured Brands guarantees.

04 · Mapping — the Mall Plus ad set (4 ad formats + push candidate) vs platform comparables

Closest in-app analogue per platform for each of the 4 G-confirmed Mall Plus ad formats (rates from the CPM-showcase package model) + the candidate 5th. The 4 formats together = the Mall Plus ad set; push = TBD premium layer.

MALL PLUS AD FORMAT	TIKTOK	SHOPEE	LAZADA	GRAB
Carousel — ₱285 CPM always-on / browse layer · ~5% vs Mobile Banner	Carousel Ads / In-Feed (browse-based discovery)	Discovery Ads (You May Also Like + Daily Discover, CPC)	Sponsored Display JFY Banner / Card · Sponsored Discovery	In-Feed Image Ads (home / GrabFood / GrabMart feeds)
Featured Brands — ₱304 CPM branding shelf · ~5% vs Promo Card Prime	Spark Ads (boosted brand / creator content)	Shop Search Ads (shop at top of SERP)	Sponsored Brand Boost (homepage + JFY placements)	Masthead Ads (home-feed pride of place)
Hot Keywords + Sponsored — ₱11.40 CPC (~5%) search layer · ₱228 CPM-equiv @ 2% CTR	Search Ads (keyword-bid, high intent)	Product Search Ads (keyword CPC from ₱0.30)	Sponsored Max / Discovery (AI search + recs)	Search Ads / Listing Ads (CPC keyword auction, match types)
Pop Up — ₱361 CPM premium recall layer · ~5% vs card	TopView / Branded Takeover (app-open, guaranteed)	Homepage Brand Ads (CPM, reserved dates, guaranteed)	Sponsored Display homepage slots (CPM rate card, reserved)	In-Transit Ads (post-transaction premium moment) / Masthead
Push Notification — TBD CPM CANDIDATE 5TH CRM-trigger premium layer · GCash official · CTR base 4%	— (no standalone push ad unit)	— (push = CRM / campaign amplification only)	CRM Push — bundled in Sponsored Display (no standalone rate)	— (In-Transit is in-app, not device push)

What to borrow from the competitive set

- Grab's in-transit insight** (post-transaction, 2.5× engagement, less competing content) is the strongest external validation yet for Mall Plus' receipt-page & Pop Up moments — the GCash equivalent of "in transit" is the transaction / confirmation screen.
- Reservation mechanics** (Shopee / Lazada / Grab premium): sell premium Pop Up & Featured Brands as date-bookable, guaranteed slots — matches the JBP tier discounts already modeled.
- Search keyword auction playbook** (Grab / Shopee / Lazada): generic vs branded vs competitor keywords + match types — direct blueprint for Hot Keywords + Sponsored Ads package design.
- tROAS automation** (Lazada Sponsored Max, TikTok GMV Max, Shopee GMV Max — H1 2026): a future "Sponsored Max"-style Mall Plus package could auto-allocate across the 4 ad formats toward a client ROI target.
- Transparency as differentiation** (vs TikTok & Grab): publish the rate card — competitors on auction-only or unpublished pricing can't match a fixed CPM commitment.
- Push Notification as a differentiated 5th format** (GCash-official, CPM-billed, ₱100K min/placement): Lazada only bundles CRM push — nobody sells it standalone; rate TBD via Partner Marketing, CTR base 4% (market 3.05–3.78% vs GCash CRM 6%).

05 · Shopee H1 2026 — what the official deck adds to the review

Source: SHP_MP_2026_H1.pdf — Shopee PH "On-Platform Solutions 2026" (G-shared 2026-08-27). Real PH-peso seller-side economics, now folded into the competitor review.

SHOPEE PACKAGE	PRICE (₱)	WHAT IT BUYS	MALL PLUS LAYER ANALOG
Flash Spike	4,480–5,600	3 flash slots + flash voucher · 1 time window	Impulse slots — Carousel (₱285) entry tier
Monthly BAU	5,600–28,000	Campaign page + vouchers + ads credits (+ Top-Up voucher)	Always-on browse — Carousel (₱285)
Payday / Double Double	8,400–67,200	Guaranteed spike-day slots + vouchers + AMS + ads credits	Campaign-period brand — Featured Brands (₱304)
DD + Payday Bundle	44,100–88,200 (25% OFF)	Both campaigns in one booking	Package bundle — Pop Up (₱361) added
Bulk Buy (quarterly)	13,440–151,200 (25% OFF)	Reserved multi-campaign commitment	JBP-tier commitment (₱21–50M / >₱50M)

GMV Max — Shopee’s new automated tROAS product (Target / System-Optimized ROAS + ROAS Protection) joins Lazada Sponsored Max & TikTok GMV Max

All three marketplaces now push AI-allocated campaigns. Mall Plus’ differentiated bet stays the transparent fixed rate card (MadTech –5%) + the simple 4-format ad set — automation is the upgrade path, not the launch.

Shopee’s 2026 model — 3 revenue mechanics

- **Self-serve auction ads** — Product / Search / Discovery / Boost CPC from ₱0.30 · GMV Max tROAS
- **Guaranteed campaign packages** — DD · Payday · BAU · Bulk · Flash, ₱4,480–151,200, prepaid & non-transferable, unlimited slots
- **Opt-in funded programs** — SSPL 3%/6% · MDV 4% (cap ₱200) · CCB 3.36% (cap ₱100) · Live XTRA 3.36% — seller fees fund shopper discounts

Read-through for Mall Plus

- **Automation is table stakes** — the 3-platform tROAS trio validates keeping the 4-format ad set simple at launch.
- **Package mechanics validated** — guaranteed, prepaid, non-transferable slots at ₱5.6K–151K = external proof of Mall Plus’ tiered packages + JBP reservation. Different buyer (sellers vs brands) → no direct price competition with the ₱500K–5M brand tiers.
- **Fee-funded merchant mechanics** — 3–6% order-value fees bracket Mall Plus’ 5.36% net-of-VAT take rate; MDV / CCB = the analog of merchant-funded Shop Vouchers.
- **Livestream monetized separately** — studio ₱25K–70K · extension ₱80K–160K · Live on Wheels ₱600K–1.2M → a future GCash Live play, not launch scope.

Appendix · Off-platform products (secondary — out of primary scope)

Kept for completeness per G's direction to prioritize in-app solutions. Not part of the core in-app comparison.

PLATFORM	PRODUCT	WHAT IT IS	PRICING MODEL	BEST FOR / NOTES
TikTok	Pangle	Video / native / banner ads on third-party apps off TikTok	Auction CPM / CPC	Reach extension — only off-TikTok product
Lazada	Sponsored Affiliate	Off-platform affiliate network: 77K+ partners & 68K+ KOLs	CPS (commission per sale), ROI 5–25×	Performance sales off-platform · pay-on-sale
Lazada	Sponsored Media	Facebook / Meta ads to Lazada store from Seller Center	Meta auction (managed)	Off-platform traffic · up to 100% cashback promo
Lazada	Collaborative Ads (CPAS)	External (Meta) campaigns with Lazada catalog + retargeting	Meta auction (managed)	Off-platform retargeting · whitelisted stores only
Lazada	Performance Max	Google ads across Shopping, Gmail, Search, YouTube, Discover, Display	Google auction (managed)	Off-platform scale · Google automation + Lazada data
Lazada	Direct Matching	Off-platform audience / product matching	Via KAM	Off-platform · details via KAM
Grab	Car Wraps	Physical vinyl wraps on Grab vehicles	Per vehicle per month (managed)	OOH brand awareness · min ~1-month campaigns
Grab	In-Car DOOH	Tablets in Grab vehicles with video / interactive ads	Package (managed)	Captive-audience video · targetable by route / time / ride duration

Why this stays secondary

- Grab & Lazada treat off-platform as **reach extension** — their core ad value (and the Mall Plus analog) lives in the owned in-app transaction surface.
- Mall Plus' closed-loop advantage (transaction data + in-app checkout) is strongest **in-app**; off-platform products would dilute the story and compete on someone else's auction.
- Keep these on the shelf as future options — e.g., an affiliate/CPS layer or Meta/Google extensions once the in-app inventory is proven.

06 · What this means for Mall Plus — five takeaways

How the competitive set sharpens the Mall Plus pitch, the rate card, and the package mechanics.

1

The model is **validated** — same two layers everywhere

Every platform runs **auction performance on intent** (search/browse) + **premium CPM brand** on owned high-attention surfaces. Mall Plus is not inventing a format — it's entering a proven shape with a better-owned surface: the transaction moment.

2

Grab's **in-transit** is the closest analog to Mall Plus' Pop Up

Post-transaction placement at **2.5× engagement**, less competing content — Grab (a transaction-first superapp) structurally validates Mall Plus' receipt-page & Pop Up inventory. The GCash "in transit" is the payment confirmation screen.

3

Transparency is the differentiation

TikTok is auction-only (no rate card) and Grab doesn't publish feed/transit pricing. Mall Plus' published rate card — costed **5% below the MadTech card** (P285–361 CPM + P11.40 CPC) — is a fixed, predictable commitment, a pitch advantage for budget planners who hate opaque auctions.

4

Reserved & guaranteed premium slots are market standard

Shopee (Homepage Brand Ads), Lazada (Sponsored Display) and Grab (Masthead) all sell premium as **date-bookable, guaranteed inventory**. This validates the Mall Plus package unlocks + JBP tier-discount reservation model (P21–50M –5% · >P50M –10%).

5

Keep it **self-serve-able**, sell the premium managed

All four platforms publish self-serve ad managers. Mall Plus' 4-format lineup is already simple enough for self-serve booking (Carousel / Featured Brands / Hot Keywords) with premium Pop Up sold managed — matching how Shopee & Grab split self-serve vs AMS/GrabAds-team.
