

Retail Media Stack — DMP · SSP · DSP (Working Model)

How the ecosystem monetizes: GCash owns the data (DMP) and part of the inventory (SSP), Mall Plus runs the buy side (DSP) plus its own marketplace inventory (SSP). Everything wired to the live rate cards, CTR benchmarks and take-rate math.

🕒 working model — fee/uplift assumptions flagged PROPOSED

DMP = GCash

SSP = GCash + Mall Plus

DSP = Mall Plus

1 The stack — who owns what

flows: advertiser → DSP → SSP → delivery, fueled by DMP

DMP · DATA MANAGEMENT PLATFORM

GCash

- ▶ 94M registered users · 35M fully e-KYC'd
- ▶ KYC demographics (age/gender/location/SEC)
- ▶ Payment platform: banked vs unbanked · wallet vs bank-linked · card · GGives credit
- ▶ Transaction behavior: banked/unbanked, high/low spender, send-money/bills/load activities
- ▶ 50+ interest affinities (nightlifers, pet lovers, beauty junkies...)
- ▶ City-level geo · GGives credit signals

SSP · SUPPLY-SIDE PLATFORM

GCash + Mall Plus

- ▶ **GCash surfaces:** receipt page ₱230 · promo card ₱320 · mobile banner ₱300 · pop up ₱380 (MadTech 2026 real)
- ▶ **Mall Plus surfaces:** Carousel ₱285 · Featured Brands ₱304 · Hot Keywords ₱11.40 CPC · Pop Up ₱361 (A-scenario, MadTech -5%) · Push TBD
- ▶ Reservation mechanics: prepaid · 2-hr payment · guaranteed slots (Pop Up/FB) · 1,000-imp increments
- ▶ Unified rate card = transparent CPM commitment (differentiation vs auctions)

DSP · DEMAND-SIDE PLATFORM

Mall Plus

- ▶ Campaign builder: objective → bidding mode → target level
- ▶ **Product mix** — SKU/category lines with share & AOV (e.g., Electronics: smartphones 60% · laptops 40%)
- ▶ **Duration & flight plan** — start/end dates · 14-day calibration freeze · daily pacing (₱/day, imps/day)
- ▶ Targeting UI on DMP segments (broad → interest → transaction → CRM retarget)
- ▶ Budget & ROI dials (Launch/Standard/Conservative; future Auto/GMV-Max style)
- ▶ Managed tier (JBP 1-3, -5%/~10%) + future self-serve
- ▶ Reporting: impressions fill, blended CPM, CTR, CPC, landing conv, ROAS

Advertiser budget

DSP Mall Plus

SSP GCash + Mall Plus inventory

Delivery & attribution

DMP GCash segments feed targeting **both** ways

2 DMP — GCash data products

uplift & fees are PROPOSED assumptions — validate with GCash data team

SEGMENT PRODUCT	DATA USED	CTR UPLIFT VS BROAD	DATA FEE ON MEDIA	BASIS
Broad (no data)	— all GCash users	1.00×	0%	Baseline
Interest affinity	50+ affinities (nightlifers, pet lovers...)	1.30× PROPOSED	+10% PROPOSED	Airship: personalization lifts opens +37%; GCash affinities from transaction signals
Transaction behavior	high spender, banked, category spenders	1.60× PROPOSED	+15% PROPOSED	Purchase-intent audiences outperform affinity (OptimO case studies)
CRM retarget	previous brand/product purchasers (KYC + txn)	2.20× PROPOSED	+20% PROPOSED	OptimO Vaseline: CRM audiences → -40% CPLPV, -2% CPA; Airship segmentation up to +350% purchases

GCash FAQ confirms sellable targeting: demographics, transaction behavior, 50+ affinities, city-level geo (CPM-billed, ₱100K min per placement). Fee schedule is a working assumption — OptimO-style "ready-made audiences" are the premium tier.

3 SSP — the two inventory sides

GCash surfaces = MadTech real rates · Mall Plus = Scenario A

GCash surfaces

MadTech 2026 rate card

SURFACE	CPM ₱	CTR	LAYER
Pop Up	380	3.93%	Premium recall
Promo Card Prime	320	0.56%	Persuade
Mobile Banner	300	0.20%	Targeted
Receipt Page	230	0.84%	Attention

Mall Plus surfaces

Scenario A · MadTech -5%

FORMAT	RATE	CTR	LAYER
Carousel	₱285 CPM	0.80%	Always-on browse
Featured Brands	₱304 CPM	0.50%	Branding shelf
Hot Keywords + Sponsored	₱11.40 CPC	2.00%	Search
Pop Up	₱361 CPM	3.93%	Premium recall
Push Notification CANDIDATE	TBD	4.00%	CRM-trigger

MALL PLUS (DSP + OWN SSP) — REVENUE

₱3,175,179

DSP managed-service fee	₱300,000
Mall Plus SSP media (own surfaces)	₱1,500,000
Take-rate revenue (5.36% × GMV)	₱1,375,179
Mall Plus gross	₱3,175,179

GCASH (DMP + SSP) — REVENUE

₱1,950,000

DMP data fees (segment surcharge)	₱450,000
GCash SSP media (own surfaces)	₱1,500,000
GCash gross	₱1,950,000

GCash-side blended CPM fixed at ≈₱304.00 (MadTech B mix: Pop Up 25% · Promo 25% · Banner 20% · Receipt 30%) and CTR ≈1.41%. Mall Plus side uses the selected level's blended CPM (₱271.70 / ₱286.90 / ₱315.40) and mix CTR (1.10% / 1.41% / 2.53%). Data uplift applies to blended CTR; data fee applies to total media.

5 Model guardrails

What's real vs proposed

ITEM	STATUS
Rate cards (A: MadTech -5% · B: MadTech real)	REAL (files)
CTR benchmarks (Q2'23 GCash + mix-weighted)	REAL (files)
Take rate 5.36% net of VAT	REAL (Go-Live model)
GCash min buy ₱300K / ₱100K per placement	REAL (GCash FAQ)
Data-tier CTR uplifts (1.3×–2.2×)	PROPOSED — basis cited
Data fees (+10/+15/+20%) & DSP fee (+10%)	PROPOSED — price with finance/GCash

Operating rules

- Impressions guaranteed (CPM contract) — ROAS delivered, never promised.
- 14-day calibration freeze; changes restart the window.
- DMP data is GCash's moat — Mall Plus (DSP) licenses segments, doesn't own them.
- SSP neutrality: GCash surfaces priced at MadTech card; Mall Plus at -5% — the spread is the JBP discount headroom.
- Push Notification (candidate 5th) excluded until GCash quotes the rate.
- Model mirrors OptimO's "ready-made audiences" and TikTok's ROI-dial — automation is the upgrade path, not the launch.
